

Heather M. Wojton, Ph.D.

Heather Wojton is the Director of the [Operational Evaluation Division](#) (OED) of the Systems and Analyses Center. In this position, she provides strategic leadership, project oversight, and direction for the division's research program, which primarily supports the Director, Operational Test and Evaluation, within the Office of the Secretary of Defense.

In her previous role as IDA's Director, Research Quality and Chief Data Officer, Heather provided strategic leadership, project management and direction for the corporation's data strategy. She enhanced IDA's ability to efficiently and effectively accomplish research and business operations by assessing and evolving data systems, data management infrastructure and data-related practices. She also oversaw the quality management processes for research projects, including the research product publication process and the technical review process.

Heather joined IDA in 2015 as a member of the research staff in OED. She is an expert in quantitative research methods, including test design and program evaluation. As a researcher at IDA, Heather led IDA's test science research program that facilitates data-driven decision-making within the Department of Defense by advancing statistical, behavioral, and data science methodologies and applying them to the evaluation of defense acquisition programs. Heather's other accomplishments include advancing methods for test design, modeling and simulation validation, data management and curation, and artificial intelligence testing.

Heather has a doctorate in experimental psychology from the University of Toledo and a bachelor's degree in research psychology from Marietta College, where she was a member of the McDonough International Leadership Program. She is a graduate of the George Washington University National Security Studies Senior Management Program and the Maxwell School National Security Management Course at Syracuse University.

About IDA

IDA is a nonprofit corporation that operates three federally funded research and development centers in the public interest. IDA answers the most challenging U.S. security and science policy questions with objective analysis leveraging extraordinary scientific, technical and analytic expertise.
